## ETIP SNET (European Technology and Innovation Platform for Smart Networks for Energy Transition)

**Introduction to R&I activities in the scope of the ETIP  
SNET; presentation of the R&I roadmap 2016-2025.**

**Second ETIP SNET regional workshop, Lisbon, 28 September 2017**

**Eric Peirano, Ph.D., TECHNOFI, COO**

- ▶ **The ETIP-SNET 2017-2026 R&I roadmap**
- ▶ **The path towards the updated roadmap and next IPs**
- ▶ **The coming 17-19 implementation plan**
- ▶ **Contribution expected from the workshop participants**

# A new roadmap and associated Implementation Plans

Electricity system  
Integration of RES

Electricity system  
Integration of storage + other flexibilities  
Integration with other energy networks

Integrated energy system

EEGI roadmap  
2013-2022

ETIP-SNET roadmap  
2017-2026

ETIP SNET roadmap  
2020-2029

IPs every year

IP 16-18

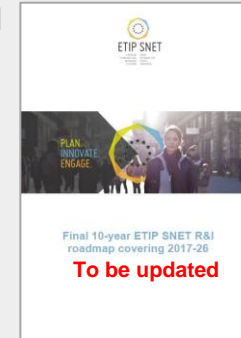

IP 17-19

To be published during Utility Week 2017

IP 19-21

IP 21-23

Final 10-year ETIP SNET R&I roadmap covering 2017-26  
To be updated

INTENSYS4EU

# Electricity grid = backbone of energy system

Offers flexibility solutions and enables the integration of all flexibility means

# Flexibility is addressed in several functional objectives

## Transmission

C1: Modernization of the Network

C2: Security and System Stability

C3: Power System Flexibility from  
Generation, Storage, Demand and Network

Flexibility from

- Storage
- Demand response
- RES with forecasting tools
- Interactions with other energy networks
- Thermal power generation

C4: Economic & Efficient Power System

C5: ICT and Digitalization of Power System

## Distribution

C1: Integration of Smart Customers

Flexibility from

- Demand response
- Energy efficiency in buildings

C2: Integration of DER and New Uses

Flexibility from

- RES
- Storage
- Transport (Evs)
- Interactions with other energy networks
- Thermal power generation

C3: Network Operations

Flexibility from

- Grid

C4: Network Planning and Asset Management

Flexibility from

- Asset management

# Outline

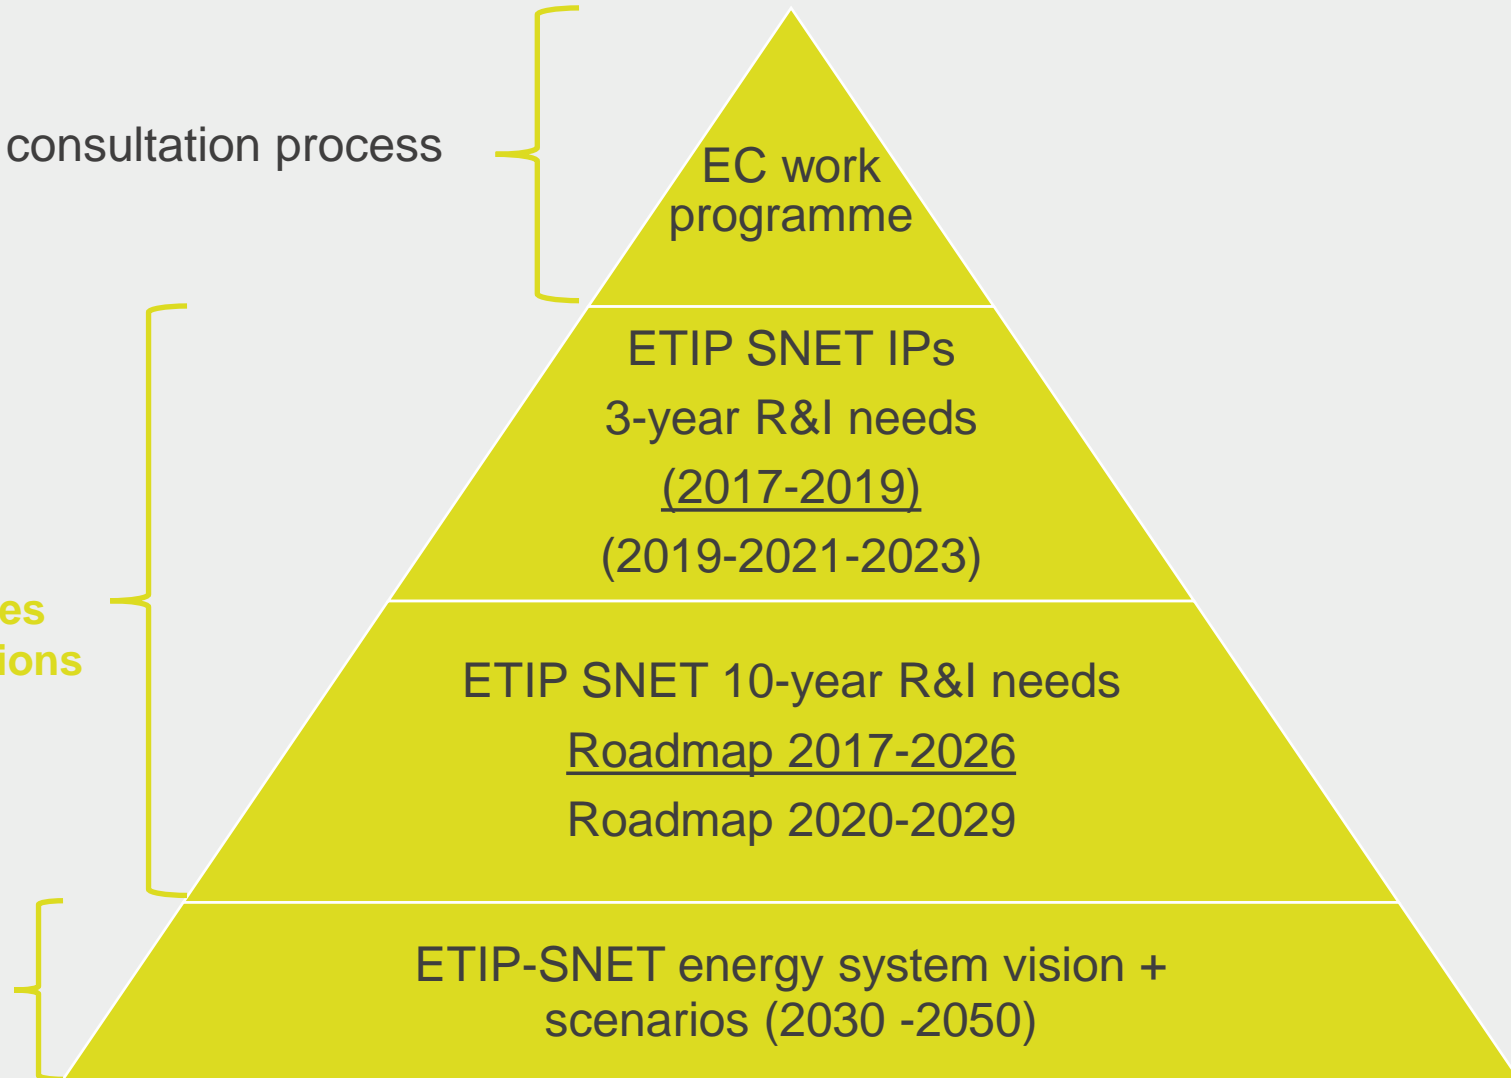

- ▶ The ETIP-SNET 2017-2026 R&I roadmap
- ▶ **The path towards the updated roadmap and next IPs**
- ▶ The coming 17-19 implementation plan
- ▶ Contribution expected from the workshop participants

# ETIP SNET process hierarchy

EC consultation process

- Member States
- ETIP SNET experts (WGs)
- Public consultation
- **Regional workshops**
  - **Lessons learnt**
  - **Needs for further specific R&I activities**
  - **Implementation plans for the innovations**
  - **Barriers to innovation deployment**
- Monitoring of projects
  - assess the coverage of the R&I activities **by national** and European **projects**

ETIP SNET experts (WGs)

# Proposal to structure the next IPs and the next roadmap

electricity/heat (e.g. heat pumps) and electricity/gas (e.g. power-to-gas)

Consumers connected at transmission or distribution level

Power Transmission Networks

Power Distribution Networks

Flexible generation (large-scale)

Large-scale storage

Other energy networks (gas, heat)

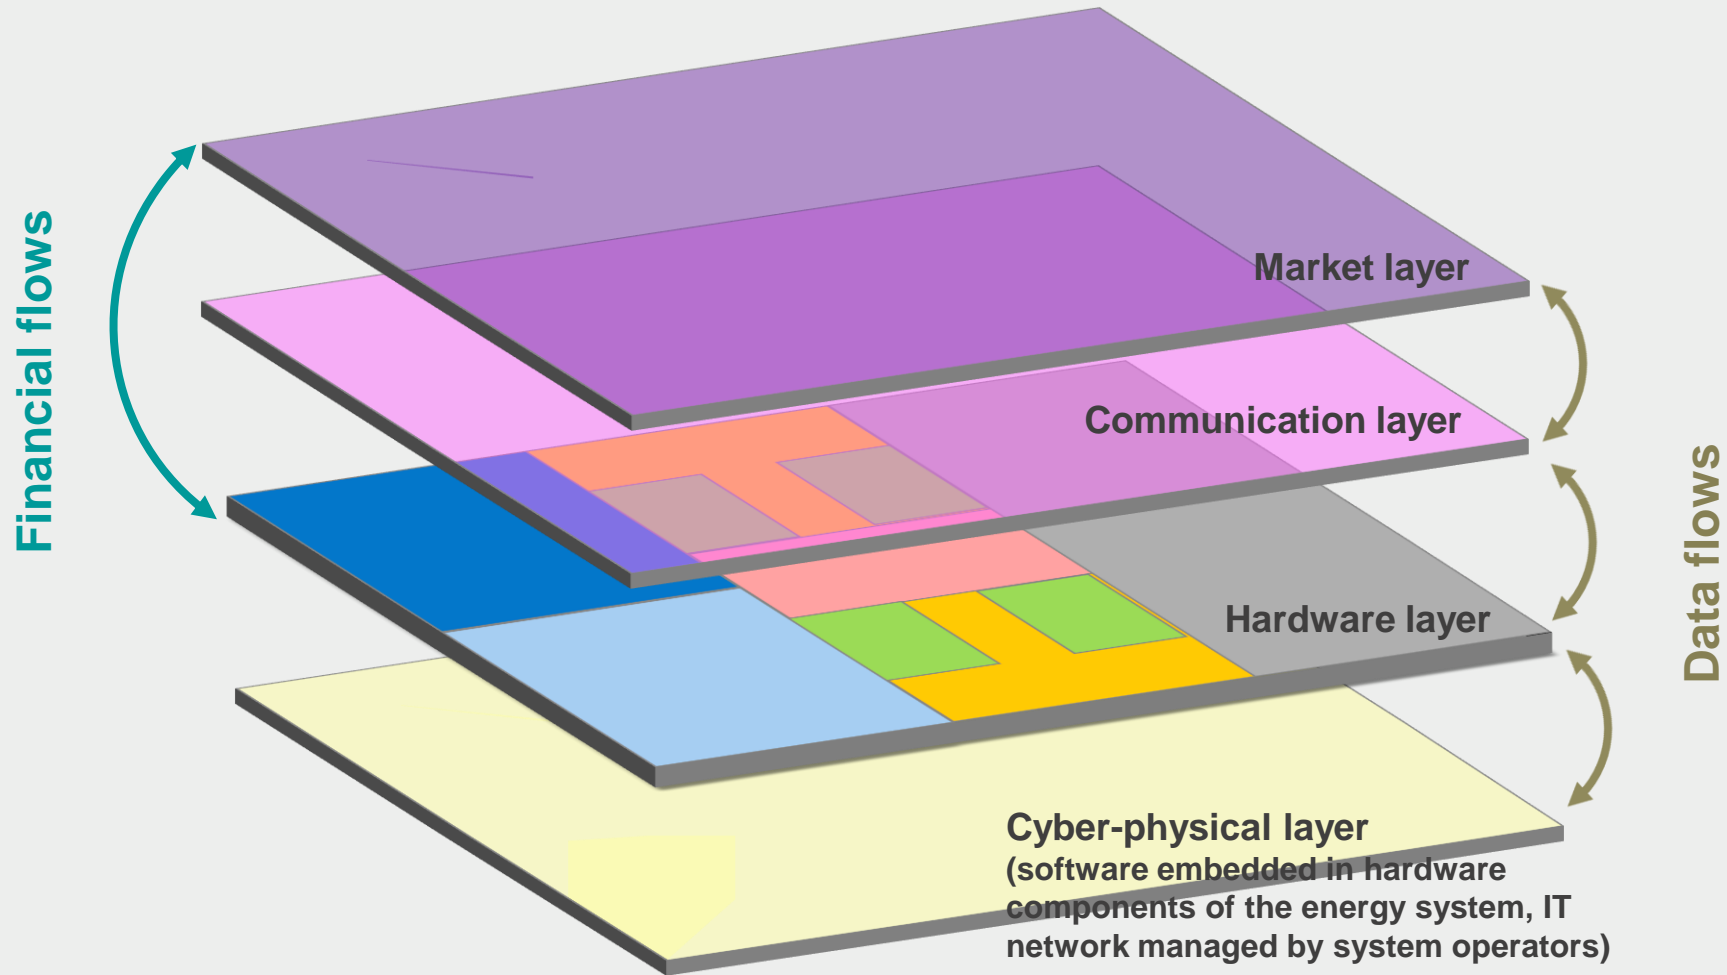

Distributed storage

Flexible generation (distributed)

# Proposal to structure the next IPs and the next roadmap

ETIP SNET PLAN.  
INNOVATE.  
ENGAGE.

# Outline

- ▶ The ETIP-SNET 2017-2026 R&I roadmap
- ▶ The path towards the updated roadmap and next IPs
- ▶ **The coming 17-19 implementation plan**
- ▶ Contribution expected from the workshop participants

# Structure of the IP 17-19

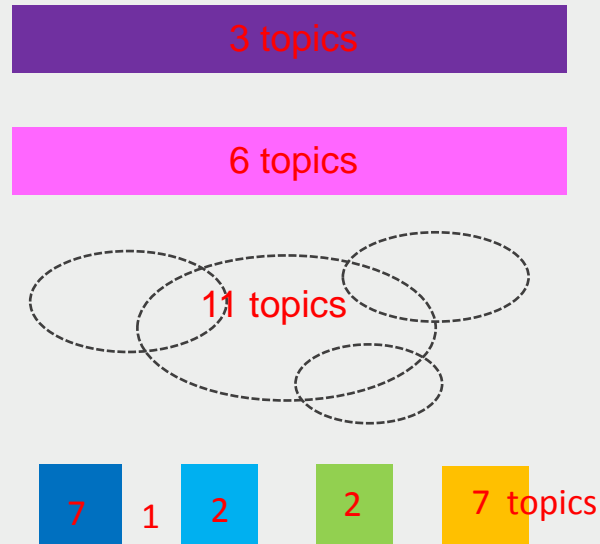

## Structure of the initial draft IP

- Transmission
- Distribution
- Storage, sector interfaces
- Flexible generation
- Digitalisation

**56 topics**

## New structure of the IP: highlight the synergies and interfaces within the energy system

identification of synergies between topics

**High-RES and empowered end-user energy system: governance and market design**

**Digitalisation of the energy system**

**Integrated grid with improved interfaces** between energy system components (such as gas and heat)

**Improved components of the energy system:** electricity networks (transmission & distribution), generation units (thermal, variable renewable, hydro, etc.) and storage

**39 topics**

# The coming IP 17-19

- 2 **Market design for trading of heterogeneous flexibility products:** *develop a flex market concept that allows the trading of ‘heterogeneous’ flexibility products (coupling electricity, heat and gas markets, both at the wholesale and retail level), taking into account the specific capabilities of each resource;*
  
- 9 **Cybersecurity of critical energy infrastructures:** *assess in depth cybersecurity issues and propose solutions so as to maintain the system robust against possible cyber threats*
  
- 7 **Design and demonstration of grid digitalization:** *specify and demonstrate for the future energy system the digital technologies ensuring system reliability.\**  
*\* Includes “ intelligent demand and response assets appliances”*

ETIP SNET PLAN.  
INNOVATE.  
ENGAGE.

# Outline

- ▶ The ETIP-SNET 2017-2026 R&I roadmap
- ▶ The path towards the updated roadmap and next IPs
- ▶ The coming 17-19 implementation plan
- ▶ **Contribution expected from the workshop participants**

# Contribution expected from the workshop participants

- ▶ To foster networking and exchange of positive and negative experiences between projects at EU and national/regional levels.
- ▶ To help the ETIP SNET detect national projects with strong EU added value and feed the **monitoring process** to appraise the **coverage** of the existing knowledge.
- ▶ To help the ETIP SNET identify the **need for further specific R&I activities** to be specified in the updated roadmap and next IPs.
- ▶ To help the ETIP SNET identify **barriers to innovation deployment**.
- ▶ To inform the ETIP SNET about good practices gained in pilots and demonstration activities (**monitoring process**).
- ▶ To inform the ETIP SNET about the **implementation plans for the innovations** so as to support knowledge transfer to all stakeholders.
